

# Installation ID:

Luxury Yacht

**End Customer:** Owner of private yacht

**Location:** The Seven Seas

**Installer:** AudioVisions

**Equipment:** Crestron 32x32 DigitalMedia Matrix Switcher, with cards for 17 HDMI inputs and 10 HDBaseT outputs, and corresponding HDBaseT receiver/controller at each display.

## Why HDBaseT:

Elegant solution, with no cable clutter. All video source equipment was placed in one, out-of-the-way location. No latency or degradation of image. Cat cable provided easy field termination in this unusual setting.

**Details:** AV distribution in a 245-foot luxury yacht, connecting the theatre, four guest staterooms, the crew's mess and the owner's suite to a central distribution room, with eight satellite receivers (that changed depending on what part of the world the ship was located), and Kaleidescape movie player. Each source must be available in high-definition on all the displays reliably and without signal degradation. Full HDBaseT installation, running Cat6 cable throughout the yacht. Field termination done on the spot.
