

Installation ID:

Medical Center

End Customer: Westmed Medical Group

Location: New York

Equipment: Key Digital KD-CATHD500 HDMI Extenders with HDBaseT balun, over Cat6 STP cables, 72 displays to form video walls

Details: New multi-story 85,000sq/ft medical facility, with video walls deployed throughout to broadcast relaxing images for a calm and welcoming environment in waiting rooms and corridors. Need for robust engineering and high performance, deployed within six weeks of kick-off.

Why HDBaseT:

Installation simplicity complied with short deployment time; long cable runs, display location issues, insufficient space for equipment, which led sources to be placed up to 300ft away; high resolution, top quality & performance required, while remaining within budget.
