

End Customer: The Helsingborg Arena

Location: Helsingborg, Sweden

Installer: Fremlab AB

Equipment: Crestron's HDBaseT-enabled DigitalMedia™ 32x 32 Matrix Switcher (DM-MD32X32); XPanel for Computers (SW-XPANEL-FOR-MAC); 3-Series Control System® w/infiNET EX®; fifty 46' Mitsubishi displays (LDT-462V LCD), pre-loaded with Crestron Connected™ technology for ease of interoperability.

Details: AV and lighting control at the 21,000 sq.m. (226,000sq.ft.) sport arena, including three gymnasiums, seating areas for up to 5,500 spectators and several foyers, bars and restaurants. The HDBaseT-enabled switcher handles the live video system, PTZ cameras, the server that handles the digital signage, and a series of patch panels in the main halls and conference areas.

Why HDBaseT:

Easy to configure and to install. Future-proof system that enables expansion and addition of new sources/displays. Distribution over long distances without compromising performance.
